

HD MASTER

- ✓ To be used with HDRunner III transmitter by Livetools
- ✓ Up to 4 cameras in a single UHF channel (12.5KHz)
- ✓ Support most popular professional camera brands
- ✓ Exploit original camera manufacturer control panels to maximize user comfort and minimize learning period
- ✓ Handle tally flags (red, green) and one additional GPIO
- ✓ Transmitter can be placed near emitting antenna and can be connected by RS232 or IP
- ✓ Compact size
- ✓ Two different control modes : unidirectional and bidirectional

Specifications

- ✓ Up to 4 cameras in a single UHF channel (12.5KHz)
- ✓ Support 2 different control modes:
 - Unidirectional for complex, long range operations
 - Bidirectional for low latency setups
- ✓ Support most popular professional camera brands:
 - Sony
 - GrassValley
 - Others on request
- ✓ Exploit original camera manufacturer control panels to maximize user comfort and minimize learning period
- ✓ Handle tally flags (red, green) and one additional GPIO, independently for each camera
- ✓ Sold with TRX transmitter
- ✓ wide frequency band for maximum flexibility: 410-470MHz
- ✓ narrowband: 12.5KHz
- ✓ efficient GFSK modulation
- ✓ Ethernet port for device configuration, HDRunnerIII remote control
- ✓ AC or DC power input (110-245Vac or 12Vdc)
- ✓ Power consumption: <10W
- ✓ Size: 220 x 350 x 44mm (Rack 1/2U)
